Ravindu Denuwan

Hey,

I'm a self-taught software developer with a few years of experience. I started my programming journey with Java and HTML. Currently, I'm on the leaning path of C++ (MSVC), Rust and Qt6. Mostly, I use the documentation and some books to learn languages, Frameworks and other tools and for DSA and the CS concepts I used OCW and Harvard CS50 courses which I'm loving so far. I love participating in Programming competitions too. Like Google Kickstart, HashCode and CodeJam.

After mastering algorithms and finish learning C++, Rust and Qt, I'm thinking of diving into ML and Deep learning fields. Hopefully, I'll be able to be a good AI engineer too. Since, I do love almost everything about CS, I will try to learn almost everything. Like Go, R, Ruby, Cyber Security and etc.

I'm not really good with either UI/UX dev or with content with long paragraphs. Give me a good UI/UX form, I'll bring it to life. You can find information about me and my projects on my portfolio website.

❖ Personal Information

Full Name: Pallek Kankanamge Don Ravindu Denuwan Wijegunawardhana

Birthdate: 2002 March 02

Address: 452/A,
Waraniyagahalanda Watta,
Kiriberiya,
Panadura

Email: ravindudenuwan.dev@gmail.com

Mobile: +94783579263

❖ Skills

Languages

- C++
- Java
- Rust
- JavaScript
- CSS
- HTML

Frameworks and Tools

- CMake
- Spring Boot
- ReactJS
- Redux
- NextJS
- Git
- MongoDB
- MySQL

I've tried Docker, JakartaEE, Nodejs, Hibernate and Qt6 too and I still have a lot to learn about those technologies. Which I'm planning to learn in the near future.

❖ Qualifications

- Reusable code implementing OOP concepts
- Clean and structured code blocks
- Efficient analysis and usage of algorithms with good Data structure implementations
- Unit testing and integration testing
- Deep knowledge in basic language and CS concepts including basic data structures
- Experience in react-based front-end frameworks
- Experience in both SQL and NoSQL databases
- Experience in asynchronized development in JS
- Experience in rest api
- Passionate about learning new languages and technologies

❖ Interests

- Rock Music
- Gaming
- Martial Arts
- Movies and Tv Series
- Mathematics
